MongoDB

Profile

Web Developer with the ability to adapt and learn while focused on creating high-quality results under strict deadlines. Seeking to expand my knowledge and build upon my web application skills.

Academic Projects

COMPUTER REPAIR WEBSITE

Technologies Used: · Angular.js, Node.js, Express, REST API, MongoDB, Material Design, HTML/CSS, JavaScript

- This application replicates a computer repair e-commerce website. It utilizes MEAN stack technologies to provide features such as user security, data storage, invoice summaries, and CRUD operations.

GPA CALCULATOR APP

Technologies Used: Angular, Node.js, Express, Material Design, HTML/CSS, JavaScript

- This application allows users to generate transcripts through the inputting of grades & courses. It utilizes Angular.js to provide Object Oriented Principles like inheritance.

Work Experience

Driver/On-Duty Manager, Tiffs Treats

2019 — Present

- Oversee store operations ensuring efficient workflow in a fast-paced environment.
- Delegate tasks to employees and ensure all orders were processed, made, routed, and correctly delivered to customers.
- As a driver, ensured customers were satisfied and happy with deliveries.

Handy Man, Brandt Properties

2018 — 2019

- Duties included flooring & roofing, basic wiring throughout building, and other activities as needed.

Education

Bellevue University, BS Web Development

2020 — 2022

GPA: 3.7
